Projects

MovieHouse

MovieHouse is a frontend application developed with React that allows users to discover and get movie recommendations. It uses a public API to display popular, trending, or similar movies to those the user likes.

<https://github.com/Ayoub-fetti/Movie-House.git>

WeatherApp

Weather app developed with Vue.js and Tailwind CSS. It allows you to search for a city and display real-time weather data via an external API. Modern interface, error handling, and mobile-first design.

<https://github.com/Ayoub-fetti/Weather-App.git>

AtlasVolunteers

AtlasVolunteers is a web application designed to facilitate the connection between volunteers and organizations. Its goal is to simplify the search, management, and participation in community service projects, while promoting civic engagement and social impact.

<https://github.com/Ayoub-fetti/AtlasVolunteer.git>
